

ARCHITECT & DESIGNER
Aluminium Collection

HALLMARK
PANELS LIMITED

Aluminium coloured panels are manufactured at Hallmark's 'high tec' powder coating plant. The Aluminium base is sprayed at high pressure with a powder coat. This is then 'baked' at very high temperatures. This powder coating technology is widely recognised in manufacturing industries as providing a superior and long lasting finish for products where a high quality, durable and corrosion resistant finish is required. The Aluminium range is available in four distinctive woodgrains and can be manufactured in any RAL colour.

Variations in colour and patterns do occur to those illustrated due to manufacturing and printing limitations. The company reserves the right to change the product range without prior notice.

The decorative aluminium moulding can either be powder coated to match the door or left as a polished aluminium.

Two years in development, the aluminium panel is available in four wood grain finishes and, quite literally, any RAL colours.

The wood grain finishes are foiled with the nature of the aluminium skin providing a more distinct and authentic grain than with PVC skins. Mouldings, also produced using high-grade aluminium extrusions that are welded and milled for superb quality and feel, offer an appearance that is far more distinctive.

One of the key properties, the minimal expansion and contraction of aluminium; accordingly the aluminium doors are not subject to the stresses that result in the failure of many wood-grained PVC panels.
